

CLEANTECH

EDC HELPS CANADIAN CLEANTECH GO GLOBAL

You're a Canadian cleantech company with innovative technology that you want to share with the world.

Exporting is your obvious next step, but you need help. That's where Export Development Canada (EDC) comes in. Our specialized cleantech team provides solutions for financing and risk protection, expert knowledge about international trade and trusted global connections, so you can grow your business with confidence.

GROWTH AND WORKING CAPITAL FINANCING

Maximize your cash flow

With guarantees to your bank for loans up to \$10 million, the [EDC Export Guarantee Program](#) (EGP) helps extend your line of credit and provide term loans to increase your working capital and cover the costs of work-in-progress, buying equipment or opening an office outside Canada.

Increase your working capital with bonding guarantees

Our [Account Performance Security Guarantee](#) (APSG) and [Foreign Exchange Facility Guarantee](#) (FXG) replace the collateral your bank needs for letters of guarantee or foreign exchange contracts, freeing up your cash to pursue new business opportunities.

Scale up financing

We offer [direct loans](#) to finance work-in-progress costs, expand operations or enter new markets.

Accelerate your global growth

Access up to \$5 million in additional capital through the [EDC Investment Matching Program](#). We'll work with your venture capital or private equity investors to increase the funding you need to grow your business and expand internationally.

Get large-scale project support and financing

We act as a partner to support, arrange and underwrite financing for large-scale cleantech projects through our [Structured and Project Finance](#) solution.

RISK PROTECTION

Ensure you get paid

Our [Credit Insurance](#) covers up to 90% of your losses if a customer doesn't pay and allows you to extend your payment terms to give you a competitive edge.

MARKET KNOWLEDGE AND GLOBAL CONTACTS

Make informed decisions

We provide detailed information about [countries](#) and [markets of interest](#), along with in-depth economic analysis and research on global trade issues that matter to you.

Meet global companies that need your technology

With the [EDC Business Connections Program](#), we'll introduce you to leading international companies looking for Canadian innovation and expertise, and help you open doors to opportunities in global markets—faster.

We can help if you're:

- A Canadian cleantech company with a technology or service proven to reduce environmental impacts
- Securing your first export contract or already exporting

As Canada's export credit agency, Export Development Canada is committed to working with Canadian cleantech companies to help realize the economic and environmental benefits of clean technology and support the growth of Canadian cleantech companies.
